

Next Generation Science Standards – Crosscutting Concepts

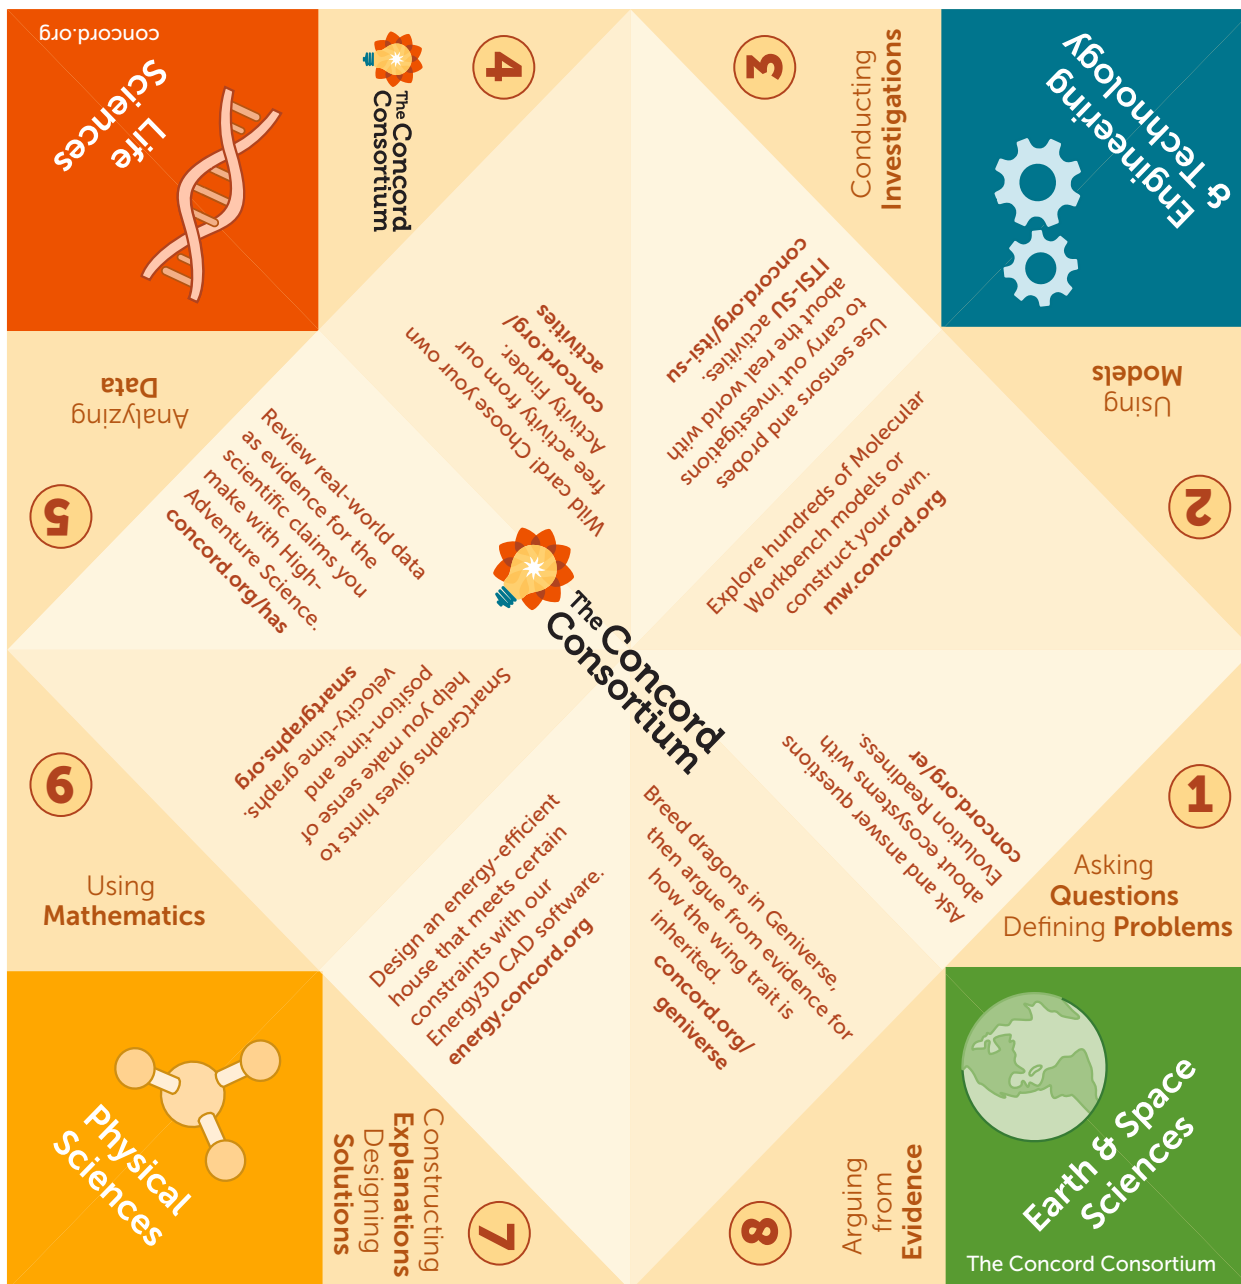

Find your path through the Next Generation Science Standards with help from the Concord Consortium's fortune teller.

1. Cut out the square above.
2. Fold into fortune teller.

- With text side down, fold four corners into center.
- Flip the paper over and fold corners up again.
- Fold in half.
- Place your fingers under the four flaps.

3. To start, choose a color. Spell out the color (g-r-e-e-n for Earth & Space Sciences, for instance) by using your thumbs and fingers to switch back and forth between the two numbered groups of concepts on the inside – one switch per letter.
4. You will now be viewing a numbered set of concepts. Select one of the numbers, and switch back and forth again that many times.
5. Select a concept and open the flap to uncover your fortune!

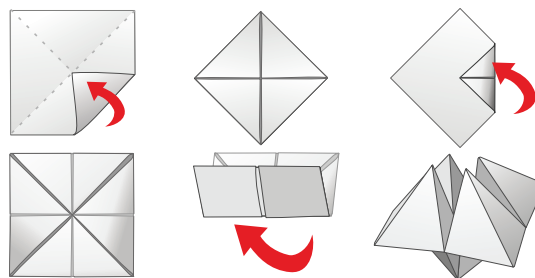

Next Generation Science Standards – Scientific and Engineering Practices

Find your path through the Next Generation Science Standards with help from the Concord Consortium's fortune teller.

1. Cut out the square above.
2. Fold into fortune teller.

- With text side down, fold four corners into center.
- Flip the paper over and fold corners up again.
- Fold in half.
- Place your fingers under the four flaps.

3. To start, choose a color. Spell out the color (g-r-e-e-n for Earth & Space Sciences, for instance) by using your thumbs and fingers to switch back and forth between the two numbered groups of practices on the inside – one switch per letter.
4. You will now be viewing a numbered set of practices. Select one of the numbers, and switch back and forth again that many times.
5. Select a practice and open the flap to uncover your fortune!
